EXPERIENCE

September 2020 – January 2024
Developer Specialist • Telcel
- I automated reports with Java to reduce the handmade reports and send them by email.
- I managed & developed the Sign Contract module for a national Android mobile application in order to use less physical paper.
- I developed and managed SOAP & RESTFUL web services.
- Technologies used: Java Spring, Spring boot, Microservices, Oracle Database, Linux command line, Android Studio.

July 2018 – October 2019
PHP Developer • Grupo Humanitta
- I developed an invoice system for payrolls to reduce about 80% of work for the H.R area so they can calculate the payment and taxes easier.
- Technologies used: SQL, PHP OOP, JavaScript, HTML, CSS.

April 2017 – June 2018
C# Developer • Consultoría Dual
- I optimized the ERP modules such as reports and invoice modules so other areas can reduce the time spent on analyzing the data.
- Developed a desktop application for uploading Excel sheets in order to convert raw information to reports.
- Technologies used: C#, Javascript, ASP.NET, Microsoft SQL Server, Transact-SQL programming

August 2016 – March 2017
Web Developer • Vacaciones Cancun
- I designed & developed the site web and landing pages.
- Both the CRM and the landing pages were managed by me.
- I designed many databases to save information from the landing pages.
- Technologies used: PHP, HTML5, CSS3, JavaScript, MySQL, Team Foundation Server.

KEY SKILLS —

ETHICS

Knowledge
- Web Services
- Micro Services
