

Full Stack Java Developer

Felix Catzin

Cancun, Qroo, Mexico | +52 556-201-5393 | fcatzin@hotmail.com | [Portfolio](#) | [GitHub](#) | [Linkedin](#)

PROFILE

Skilled software and web developer with expertise in Java Spring Framework, Microservices, JavaScript, and React.js. Experienced in creating efficient solutions and enhancing user experience. Proficient working with WebSphere (WAS) for deploying applications and using SVN and GIT to manage projects and using Linux OS. Specialist in developing and managing API web services and Microservices. Strong team player in agile environments using SCRUM and Kanban. Studied UI / UX design in Canada with a proficient conversational English level.

SKILLS

- Java
- Java 8+
- Java Core
- Java EE
- Java Spring Framework
- Maven
- Jenkins
- Sonar Qube
- Nexus
- Kubernetes
- Docker
- Singleton
- HTTP protocol and methods
- MySQL
- SQL Server
- Firebase
- Jira
- JavaScript
- JQuery
- HTML5
- CCS3
- React JS
- Next JS
- Unix / Linux
- CI / CD pipelines
- MQTT message queuing
- OpenAI
- Postman & SoapUI manual testing

PROJECTS

PERFECTO CV

Feb 2024 - Present

Personal Project | End-to-End Development & Brand Creation

Perfecto CV is my personal project to help job hunters on creating and optimizing their resumes with AI.

- Led the complete development cycle: from ideation and UI design to project delivery, including brand creation and user experience (UX) design.
- Engineered a secure and scalable application integrating payment process, user authentication, and real-time data updates using Cloud services, ensuring robust performance.
- Built a Restful API with Python & FastAPI to handle complex functionalities with Artificial Intelligence, integrating services seamlessly with the Front-end.
- Implemented Markdown to allow the user editing his created-in-app resume and allow them to export it as PDF or DOCX.
- Utilized modern tech stack and enjoyed the process of learning cutting-edge technologies, developing with Next JS, and Firestore (NoSQL) for scalable data storage, and Python for efficient API development.
- Constantly deployment with CI / CD pipelines using Vercel and Github

Tools: Figma, React JS, Node JS, Firestore, Python, FastAPI, Markdown, OpenAI

PERSONAL PORTFOLIO WEBSITE

May 2024 – July 2024

I developed my personal portfolio website using React JS. This project was a significant milestone in my journey as a front-end developer, because as I created it, I learned Typescript. The website shows a comprehensive showcase of my skills, projects, and professional background.

- Responsible for planning, UI design, and brand design.
- Designed wireframes and prototypes using Figma before designing and developing.
- Learned the process of deploying a React application to a live server, ensuring the portfolio is accessible to potential employers and clients.

Tools: Figma, React JS, Node JS, NPM.

WORK EXPERIENCE

Full-Stack Developer | Welcome Travel Accommodation

April 2024 – Present

WTA is a company in Vancouver, Canada specializing in renting rooms for newcomers, students, and professionals, providing comfortable, convenient housing options.

- Developing and maintaining a comprehensive website and admin panel front end using Node.js with the Next.js Framework to streamline the management of rental properties.
- Created a user-friendly interface for both administrators and tenants, allowing seamless management of property listings, tenant information, and payment processing.
- Automated the rent payment process integrating back end development for an API Restful with microservices infrastructure with Java Spring Boot to significantly reduce manual work and ensure timely and accurate financial transactions.
- Collaborated with cross-functional teams to gather requirements and deliver tailored solutions that align with business goals.
- Implemented Java Spring Security best practices to protect sensitive tenant and payment information, ensuring compliance with industry standards.
- Implemented CI / CD pipelines to deploy in Vercel serverless, while scanning the code for errors and improving the code quality with ESLint.

Java Development Specialist | TELCEL

Sep 2020 – Jan 2024

Telcel is the largest and leading telecommunications company in Mexico, offering top-tier mobile network services and products, including voice, data, and internet solutions, to millions of customers nationwide.

- Led the development and maintenance of scalable API web services for national mobile contract applications, optimizing the digital signing process and reducing paper usage by nearly 100%.
- Utilized Java Spring and Spring Boot for microservices architecture to build scalable and robust API web services, enhancing the efficiency and reliability of mobile services, as well as database management technologies such as Oracle DB.
- Utilized Message Queuing Protocols such as MQTT to open the Paperless Mobile App through any branches of Telcel with a provided QR enhancing the user experience when passing data from a desktop app to a tablet app.
- Streamlined code and system architecture, improving response time by 80%, leading to a faster and more responsive user experience.
- Handle production support tasks for the Paperless application, including bug fixes and minor enhancements in the Android mobile app.
- Played a key role in agile Scrum and Kanban teams, gathering requirements, documenting processes, and collaborating with cross-functional DevOps teams delivering high-quality software solutions with Jira.

- Developed the security module of the Paperless mobile application with Android Studio, integrating it with backend API services in order to create faster and fluid interactions with the sales advisers, and avoid unauthorized access to personal customer documents.
- Contributed to the migration of legacy systems from Java 8 to Java 12, reducing maintenance costs and increasing system flexibility.
- Tested and deployed code with CI/CD pipelines using Jenkins, and automated testing with SonarQube.
- Configuring JNDI in WebSphere
- Implemented best practices in version control (Git), continuous integration, and deployment, ensuring smooth and efficient software delivery.

PHP Developer | Humanitta Group

Jul 2018 – Oct 2019

Specialized in human capital compensation, offering comprehensive payroll management and remuneration services to enhance payroll efficiency.

- Designed and implemented a comprehensive payroll system that automated manual calculations for the HR team, significantly reducing processing time and minimizing errors.
- Developed the system using PHP, SQL, and JavaScript, enabling efficient data management and user-friendly interface for HR staff.
- Integrated features such as employee data tracking, salary calculations, tax deductions, and automated reporting, streamlining payroll processes.
- Reduced payroll processing time by 80%, allowing the HR team to focus on other strategic tasks and improving overall department efficiency.

OTHER EXPERIENCES

C# Developer | Dual Consulting

Apr 2017 – Jun 2018

- Enhanced ERP system modules, focusing on report and invoice functionalities to improve data accuracy. Developed a C# desktop application to automate Excel-to-report conversions, reducing manual errors by 50% and accelerating report generation. Main Stack: ASP.NET and Microsoft SQL Server.

Web Developer | Cancun Vacation

Aug 2016 – Mar 2017

- Designed and developed responsive websites and landing pages for tourism services, enhancing user engagement. Utilized PHP, HTML5, CSS3, JavaScript, and MySQL to create dynamic, cross-device compatible web applications. Managed CRM systems, implemented SEO, and collaborated with marketing to boost website traffic by 30% and improve brand visibility.

Programmer | Palace Resorts

May 2016 – Aug 2016

- Developed a Python script using BOT03 API to automate the process of copying EC2 snapshots across different AWS regions for backup and disaster recovery purposes, ensuring significantly the high availability of critical data.

EDUCATION

UI/UX Design Specialist Co-op Diploma | Cornerstone College of Canada (Vancouver, BC)

January 2024 – April 2025

- Completed a 6-month UI/UX course with a focus on Figma.
- Developed wireframes, conducted user tests (card sorting, tree testing), created a UI kit, produced prototypes, and designed a website for a real company as part of a project.

Information & Communication Technology Engineering Bachelor's Degree | Technological University of Cancun (Mexico)

September 2016 - August 2018

- Planned, coordinated, and executed projects effectively while understanding the importance of budgeting, resource allocation, and team collaboration in the development process.
- Managed projects and oversaw the administrative aspects of development.

Informatic Systems College | Technological University of Cancun (Mexico)

September 2014 - August 2016

- Learned about Front-end & Back-end programming languages with Javascript, PHP and Java.
- Structured learning to get ready for real-world scenarios and challenges in software development.
